

HV2-2U2I for imc CRONOSflex (CRFX/HV2-2U2I)

Module for the measurement of high voltage and current

With the **HV2-2U2I** four-channel amplifier, two channels are available for measuring voltages up to 1000 V, and two channels to measure with current clamps and current transducers.

Highlights

- Measurement ranges from 1000 V_{RMS} to 2.5 V_{RMS}, selectable per channel to access voltages of 1000 V_{RMS} / 1414 V_{PK}
- Safety ratings: 600 V_{RMS} CAT III and 1000 V_{RMS} CAT II test voltage 5.4 kV
- 48 kHz analog bandwidth (-3 dB)
- Measurement of current clamps, current transducers respectively low voltage signals
- Direct support for use of Rogowski coils

imc CRONOSflex High Voltage and Current Input module (example: CRFX/HV2-2U2I)

Typical Applications

- Power measurements, measurements on electric motors, batteries, fuel cells, etc.

imc CRONOSflex - Frameless expansion, flexible modularity

The imc Click Mechanism and extruded aluminum case provide a firm mechanical and electrical connection. As a result, no mainframe or rack is needed.

An imc CRONOSflex system uses EtherCAT as an "internal" system bus for connecting various modules to the main base unit (CRFX-400 / CRFX-2000G). With the system bus, all imc CRONOSflex modules are guaranteed to be synchronized with each other. This allows various modules to be either connected in one central block or connected via

standard network cable in a spatially distributed system.

In addition, when a module is added it is automatically recognized by the software displaying its dynamically assigned ID on the front of the module.

Alternatively, connection can be made by means of standard Ethernet cables (RJ45, CAT5), thus creating a spatially distributed system.

Overview of the available variants

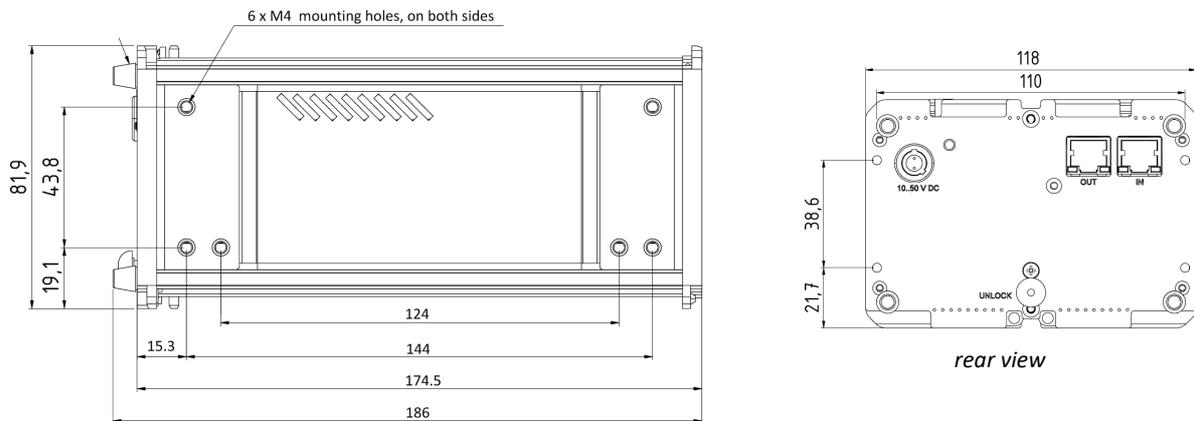

Order Code		article no.	ET version *
CRFX/HV2-2U2I	high voltage, 4 channel (2 voltage, 2 current transducer)	11900119	11910073

* ET: Version in extended temperature range

Terminal connections

- Measurement inputs: 2 pairs of safety banana jacks
2x 3-pin Phoenix terminals
- System bus (EtherCAT): 2x RJ45 sockets
- Power supply plug: LEMO.EGE.1B.302 (female) multicoded
- Module connector: 2x 20 pin (System bus and power supply)

Mechanical drawings with dimensions

Module power supply options

- Direct connection (LEMO.EGE.1B.302 power socket)
- Adjacent module (module connector / imc Click Mechanism)
- EtherCAT network cable: Power over EtherCAT (PoEC)

For further details refer to the power options documentation.

Technical Specs - CRFX/HV2-2U2I

General

Measurement modes and categories		
Parameter	Value	Remarks
Inputs	4	2 inputs for voltage 2 inputs for current measurement
Measurement modes	voltage measurement current measurement	e.g. current probes, rogowski coil
Measurement categories	600 V _{RMS} (CAT III) / 1000 V _{RMS} (CAT II)	conformant to EN 61010-1, EN 61010-2-030
Pollution Degree	2	according to EN 60664
Terminal connection	2x safety banana jacks 2x 3-pin Phoenix terminals	KGG-PC 4/3-F BK

Sampling rate, Bandwidth, Filter			
Parameter	Value typ.	min. / max.	Remarks
Sampling rate	≤100 kHz		per channel
Bandwidth	0 Hz to 48 kHz		-3 dB
Filter type characteristic cut-off frequency order Anti-aliasing filter (AAF)	low pass, high pass, band pass, AAF Butterworth, Bessel and Cauer 10 Hz to 20 kHz 8th order 4. + 4. order low pass Cauer 8th order with $f_{\text{cutoff}} = 0.4 \cdot f_s$		digital filter in steps of 1, 2, 5 low pass, high pass band pass: high- and low pass
Resolution	16 Bit 24 Bit		output format is selectable for each channel individually: a) 16 Bit Integer b) 32 Bit Float (24 Bit Mantissa)
Isolation strength		5.4 kV _{RMS}	50 Hz, test voltage
